

Figure S2. Pre-validation of up-regulated EDTA biomarkers.

The figure reports the distributions over time of the $-\Delta\text{Cq}$ of up-regulated markers in six EDTA samples. Where $\Delta\text{Cq} = (\text{Cq}_{\text{biomarker}} - \text{Cq}_{\text{mref}})$ and Cq_{mref} is the mean of the Cq values of the 3 reference genes. In the tables are reported the p-value of the contrast implemented in the ANOVA mixed model.

A: LMNA Short

B: TNF Short

C: FOSB Short
